

REPLACEMENT SEAT COVER KIT (TD5 ONLY)

ILLUSTRATED FITTING MANUAL

You will need:

- General workshop tools
- Sponge
- Glue provided

REPLACEMENT SEAT COVER KIT

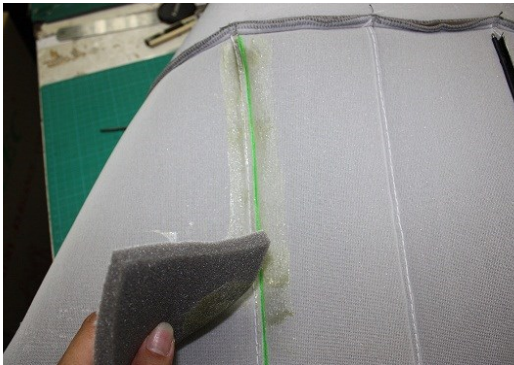

Thank you for purchasing the Replacement Seat Cover Kit. Please read these instructions carefully before commencing work.

You can fit Masai Seat Covers to your Defender in just a few hours.

Before commencing, remove the old seat covers carefully without damaging the foam material from the seats. ***Do not remove headrest covers!*** Try the new seat covers on to your seats to ensure that you are happy with the shape and fit. Turn the seat covers inside out and prepare to begin fitting.

Your kit includes:

- Appropriate seat covers
- Adhesive

1. Apply the glue at the whole length of the existing green strips on the back of the seat covers.

2. Leave to dry, at least 80% dry when the glue will not stick to your hand when touched.

3. Apply the glue on the foam of the seat area, which is to be attached to the green strips on the seat covers. Leave to dry as per the seat cover portion.

4. When glue on both surfaces does not feel sticky, carefully line both portions together as accurately as possible and attach. The adhesion should now be firm by now.

5. Wrap the seat cover onto the car seat. Press on to the glue applied area to ensure a firm bonding and the shape would be formed nicely.

6. Repeat the steps on the lower car seat portion and headrest. Note that it is not necessary to remove the existing cover from the headrest before applying your new one.

Customer Feedback

Your feedback is very important to us.

We would love to hear any suggestions or recommendations you may have about the Masai product range. If you have any feedback you think may help us improve the services or products we offer, then please use the details found at the bottom of this page to contact us.

Thank you for choosing Masai.
